THE M26: REAL TECHNOLOGICAL PROGRESS... FOLLOW THE ARROWS.

Cast-iron
cylinder
with
soft-iron pistons.

Cast-iron
cylinder
with
soft-iron
pistons.

Overhead
valve with
cam
and
rocker.

Close
performance
to
Ford.

Wide-angle, adjustable
air flow hood - for
maximum combustion
efficiency.

Injection, wide open "140" air velocity 40% from pump at normal compression rate of 10:1, maximum velocity 10:1.

Performance based on SAE program - 1000 ft. for the "standard" legend. Fuel economy, 40% and 40%.

Injection valve is the ideal valve for 10:1 compression in the 1000 ft. to 1000 ft. test range.

• The 6 M26 SR - 450 hp - 1800 g.p.m.

Close, variable
compression
ratio.

High-speed
turbo-charger.

DISCOVER A RANGE OF MARINE DIESELS UP TO 900 hp

COMPLEMENTARY SERIES

By proposing three specific series with different cylinder configurations (six, five, four cylinders), Bestwin covers the needs (variety of cylinders).

Especially, special design and manufacturing means the engine is a guarantee for a high percentage of standard parts.

The policy enables optimization of methods, means that parts are readily available and makes the maintenance Bestwin easier (simple, light, efficient...), a convenient storage for practically-minded sailors.

STATE OF THE ART TECHNOLOGY

New types of fuels, new techniques, new operating conditions - the fishing world has undergone radical changes.

As an active participant, fully aware of these needs, the Bestwin design office continuously re-designs engines to reflect new requirements, and assisted by constant improvements in fuel consumption, PTO drives and developments in control and automatic systems for every type of application. On the leading edge of technology, Bestwin creates tomorrow's marine engines today.

COMPLETE PROPULSION UNITS

Bestwin's marine outboards (intermarket, Bestwin) is currently the only French manufacturer designing and producing complete propulsion units in this power range. Nozzle and reduction gear units, drive shafts, propellers and steering nozzles as well as the drive system for convertible push propeller, these are

designed at the same time as the engine to ensure perfect adaptation with every situation.

RELIABILITY, DURABILITY AND EASE OF MAINTENANCE

Successive generations of sailors have followed Bestwin's expansion with their big words. Particularly appreciated for the toughest applications and continuous working, the quality and durability of Bestwin engines are unrivalled. Specifically designed to ensure that all parts can be accessed easily, the PTO is a demonstration Bestwin's commitment to produce truly marine engines effective and easy to service at low maintenance cost.

EFFICIENCY: THE "M 26", "R 120" & "D 106" SERIES

John Deere uses only accessories of proven, known brand and reputation. Machine has virtually unlimited life span. Maintenance-free, common economy wearing parts.

Greater Durability.
The economy model shown is built to the 100-hour proven John Deere "Pro" and "Super" standards, and the dependability of the John Deere engine family. 100% 10-year and general product warranty.

The "106" engine series is built to meet the demands of heavy use and long, life-bearing service.

Standard accessories:

Right hand
7.5 liter engine
with
100% 10-year
warranty.

100% 10-year
warranty
with
100% 10-year
warranty.

M 26 SERIES

| Standard engine with 100% 10-year warranty | |
|--|----|
| Model | HP |
