

BUKH DV36ME

When BUKH's DV 36 (multi-valve) was introduced a few years ago it created something of a sensation in the marine engine industry.

The best marine diesel in the world it was called, because it was so quiet and smooth.

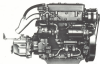

It is still the engine that has the lowest noise level.

It is still completely free from vibrations.

It has a very low fuel consumption.

It offers thorough marine disinfection for your boat/water and equipment.

With a DV 36 the larger sailing yachts, motor yachts and displacement boats can now get the same comfort, so to speak, with smaller displacements.

BUKH DV48ME

And powerful BUKH engine with moderate consumption and relatively small outside dimensions.

BUKH's thorough technology ensures the same torque and vibration free operation for which our smaller engines are renowned.

The Turbo 48 can now offer these advantages to larger loads and make them better tools.

BUKH 50 series diesel now come with three-year warranty.
