

The Direct Drive
Yacht Engine

1.2 HP to
ONLY 4.2 KW

DOLPHIN

YACHT ENGINES LTD.

Dear Sir or Madam,

We thank you for your interest in our Yacht Auxiliary Engines and your interest in obtaining literature that we hope you will find both informative and useful.

The Dolphin, both Direct Drive and Series II Generator literature supplied, are 1.2HP Yacht Auxiliary Engines designed for this one purpose: operate while an extremely compact and light weight unit in a premium, almost all other engines are general purpose units adapted for marine use and incidentally they tend to be very heavy, noisy and bulky. The Direct Drive Dolphin, on the other hand, is an very compact that it can be installed from the side or aft or fore and mounted where in the dinghy!

Very smooth and quiet running and almost in any motor and dinghy or in the case of a yacht auxiliary if the family or crew are to get any rest, then you arrange in consultation with our marine unit, we can show you the best four exceptional the Dolphin's characteristics are. Silent running and breaks low running are values which you, the prospective customer, are looking for in a new engine and we know we can show you this in the Dolphin.

Marine engine installation costs can be considerable. This price has received special attention and the Dolphin is one of the easiest of engines to install. 100% resale if you wish we offer the same year as required to suit your boat. Parts and labor come complete with manuals and know-how when necessary.

If there is any further information you require or would just like to talk about your installation and our Dolphin's suitability then please do not hesitate to call on

We assure you of our best attention at all times and look forward to your

Yours faithfully,

11 HIGH RD
