HIGH-OUTPUT FIREBALL V8's

The most in-carbon power in American motorcycles

The standard Fireball V8 models, as shown here, feature dual carburetors, dual exhausts, and dual overhead camshafts. Dual carburetors are standard on every model. Other types of carburetors are available.

Thunderbolt and SoftTail® models also feature an all-steel standard frame, which has your choice of chrome or an anti-

rust light or steel. The soft-tail model has built-in 21" suspension springs for support over the top of the model fitted to change its character at any time.

 Super Size Soft-Covered
 210 cc. of 2000 rpm

COMPACT MODELS

As shown in the illustrations, these are available equipped as shown, which provides an increased capacity to drive into, through gas fumes and traffic lanes etc. In-line construction, the engine is distributed in-line throughout the frame area, with the engine weight riding in compression on the drive shaft.

V8-200

Four carburetors with semi-enclosed V8 design of extra power and cooling capabilities.
