# SPECIALIST IN ELECTRIC GENERATING SETS.

Engineers looking for quality, performance, dependability, and smooth, efficient operation, the IVECO A410 electric generators are what you need. They meet the requirements for tested and field-proven performance and reliability at over the world. All the components are selected according to the highest specifications and the units supplied as a complete package ready to run. A variety of

options and accessories are available and tailored applications suit customer needs and space. The approval of major designers can be provided if necessary. Safety design principles are tested and checked according to stringent procedures that ensure a machine that operates also in rough environments and in heavy-duty applications.
