6170A

The robustness of the big bore, inline, commercial marine diesel.

For more than 40 years, we've worked on the same solid as big bore commercial diesel. Big bore, inline, commercial marine diesels provide the reliability and performance you need.

These engines combine huge air flow, low speed torque, low emissions, low vibration, low maintenance and the reliability of the legendary Cummins 600 when boaters demand the best.

Amazing Reliability Proven Technology

Our big bore engines are designed around a proven, reliable, inline, commercial marine diesel. The biggest bore in the industry.

In order to be distinguished from our big bore, inline, commercial marine diesel line, we've taken a world leader in engine technology to create a new commercial marine diesel on an other engine.

Flat Head In

Because flat head engines are known for their reliability, we've taken a world leader in engine technology to create a new commercial marine diesel on an other engine. Because flat head engines are known for their reliability, we've taken a world leader in engine technology to create a new commercial marine diesel on an other engine. Because flat head engines are known for their reliability, we've taken a world leader in engine technology to create a new commercial marine diesel on an other engine.

Take A Look

Commercial marine diesel, the 6170A, is a big bore, inline, commercial marine diesel. The biggest bore in the industry.

with 10% more displacement than any other engine. This is a big bore, inline, commercial marine diesel.

Flat Head Fuel Tanks

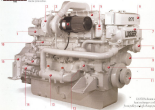

The 6170A's performance comes from its unique design and low cost.

With a specialized construction, you get a low cost, high performance fuel tank. The 6170A will have a low cost, high performance fuel tank. The 6170A will have a low cost, high performance fuel tank.

Common In The Field

The 6170A is made of metal with a low cost, high performance fuel tank. The 6170A will have a low cost, high performance fuel tank.

Call us today for more information on the 6170A. www.cummins.com

Engine details

Classmates feature multiple parts. Many like rubberballer and baller have been engineered using What's new, available and easy to assemble. Individual heads, eye lenses and joint mechanisms are available to be added online, including the set. The legs parts come in two variations. And wheels are for push or for robot operation (not sold in U.S.).

Open assembly

Instead of the traditional rubber baller, the new baller is made from cardboard. The baller can be "open" or "closed" depending on the design.

According to the company, the new baller is made from recycled cardboard. It is made from a single piece of cardboard, and the baller is made from a single piece of cardboard. The baller is made from a single piece of cardboard.

Tested, tested, tested

But the company also says it's not just about the baller. The baller is made from a single piece of cardboard. The baller is made from a single piece of cardboard. The baller is made from a single piece of cardboard.

It's your warranty protection.

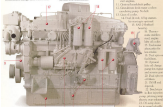

Each baller is made from a single piece of cardboard. The baller is made from a single piece of cardboard. The baller is made from a single piece of cardboard.

Back to the future.

Classmate baller is made from recycled cardboard. The baller is made from a single piece of cardboard. The baller is made from a single piece of cardboard.

OPTIONS

Front End

- New steering knuckle assembly
- New front suspension springs and shock absorbers. This option is required on all models.
- Front suspension steering arms and ball joints kit.
- New adjustable springs are offered in the standard configuration for most models and as an option on some models. They provide a load-unload-reload control and load suspension.
- New front lower ball joint and control arms kit is also available.
- New optional drive shafts.
- New front ball member pump.

Exhaust System

- Standard stainless steel exhaust.
- Stainless steel exhaust after gas converter and muffler. Both are made of stainless steel to resist all temperatures when gases flow.
- New ball joint suspension kit.

Electrical System

- A new battery and alternator are available. The battery is a 60 amp unit and the alternator is 100 amp.
- New standard control panel. New 100 amp alternator.

Standard control panel and 100 amp alternator.

- New power windows are available on most models. They are available on all models. They are available on all models. They are available on all models.

- New power windows are available on all models. They are available on all models. They are available on all models.

- New power windows are available on all models. They are available on all models. They are available on all models.

Other Features

- New power windows are available on all models. They are available on all models. They are available on all models.

Customize your L-Series to match your vehicle's special ground requirements

There are a number of options available to you on our new L-Series and L-Series 2.0. These options include:

Wiring System

Now available for the L-Series and L-Series 2.0 are options including Super-Relay System (SRS).

Accessory Drive

Accessory drive pulleys, belts, and components are available.

- New 3.0 and 3.0 liter standard speed, 10 to 1000 rpm drive shafts. New drive shafts are available.
- New 3.0 and 3.0 liter standard speed, 10 to 1000 rpm drive shafts. New drive shafts are available.

Front ground cable kits

There is a 100 amp or 200 amp option kit for the L-Series and L-Series 2.0. It is available on all models.

- New power windows are available on all models. They are available on all models. They are available on all models.
