SAVOIR-FAIRE

The power of a worldwide automotive leader

With a history of more than a century of automotive production, the Citroën Group is the world's most innovative and productive car manufacturer. Its success is based on its ability to develop new technologies.

With a 100% share in PSA Peugeot Citroën, the Group is the world's most innovative and productive car manufacturer.

- significant R&D capabilities
- modern, high performance production facilities
- world class quality

With a 100% share in PSA Peugeot Citroën, the Group is the world's most innovative and productive car manufacturer. The fact that it is a company specialized in the development of sustainable and eco-friendly components (2014 on).

COMMITMENT

Your partner from concept to production

Project specification

Project definition and feasibility study

Each application has its own unique specifications. We carefully analyze the requirements and feasibility of our projects, processes and other components in all stages of selection and installation.

Creation of specific plans

Thanks to our 3D CAD systems, customers receive exact 3D models and manufacturing CAD systems immediately. In addition, we carry out coordination of purchased engine parts and the choice of additional parts that are particularly application appropriate.

The PMA Group's research platform

Engine production

Thanks to engineering, technical and scientific, our application experts can advise and assist our clients throughout the entire production and development process.

LEADER IN PERFORMANCE

Performance and reliability

The PSA Group's high-tech solutions meet the toughest in both passenger engine and in commercial applications. Both feature robust air management and emission treatment systems, all with excellent fuel economy, and maximum quality and safety are specific to passenger engines or other engine uses.

The engine performance and mechanical systems are designed to meet the demands of the most demanding applications our products are produced for. The PSA Group's focus is on the engine's power when the vehicle is under stress, while the engine's power is always there for your satisfaction.

Specific parts designed for unique OEM applications are produced for the world's largest manufacturers and our regular Quality Assurance standards.

Performance at the cutting edge of technology

PRODUCT RANGE

Each of the components developed by the WABCO Off-Highway line are unique in their design and performance. WABCO Off-Highway offers the most advanced and reliable range of applications. WABCO's components are available for a wide range of off-highway applications and products all designed with the same quality, proven technology.

Diesel and Diesel Engines

From 4000 to 100000 horsepower, uniquely developed technology that meets every need in today's market.

Gearboxes

Manufactured to meet the toughest needs.

Mechanical Components

From the components, suspension and steering systems, and more.

Hydraulic Components

...and more for the most demanding of these vehicles.
