Decrease safety and reliability, and the prime factors when taking a vessel in care are an efficient maintenance program, a proven engineering class order. Our Company has invested in Tooling, Jigs, Machinery and diagnostic test equipment together with a modern purpose built Engineering Workshop to achieve this end, and its facilities keep pace with the changing technology in the Marine field.

Aside from rebuilding engines and outboard motors, engine repairs other work includes cooling system design, fuel injection, bearing retightening, turbocharging, overhaul and rebuild and general engine service, running, starting, tuning, balancing, load testing, water-pump repair.

The Technical Department covers electrical installation, the repair and commissioning of starters, alternators, dynamos, alternators and various electrical systems like sea-bank.

Workshop facilities include a big wheel lathe, roller, spacers, drills, and other precision tools. All Marine Workshops are available for emergency repairs and maintenance requirements and can be available for local towing in.

Workshop

Boat Working

WE ALSO REBUILD ALL KINDS OF ENGINES, BANKS AND MACHINE TOOL ALL KINDS OF EQUIPMENT

STEEL WORK

Ball, Internal/External Bearings, Camshaft Bearings, Shaft Pins, P/Shafts, W/Shafts, P/Shafts, Reverse Shafts, Gear Working, Cases

EXHAUST SYSTEM

Stainless, Bronze, Copper or Metal Flexible Exhaust Pipes, Water-cooled, Exhaust Manifolds

WELL SYSTEMS

Units, Flows, Pumps, Flows, Connections, Motor Fans

PISTONS

Steel, Cast-iron, Bigs, Cast-iron, Rings

All mechanical work, including our Engineering facilities and the Boat Work on various above and below water fittings and fixtures for painting, anodizing, stone, metals & stainless.

Various size parts for water pumps are continuously made. Where possible, therefore, we endeavour to build up and machine castings to increase their service life.

Mechanics

Our recently installed loam can fix engines up to 2500cc and efficiently bore both cylinders from three three-inches to five four-inches.

Boat Working

A Johnson Outboard Motor replacement item for engine completion is in the Boat Working Dept.

Boat Working

GREEN PUMP SYSTEMS

Systems, Brackets, Heat Exchangers, Pumps, Tanks and Connections

ELECTRICAL

Circuit-breakers, Magnets, Dynamos, Alternators, Motors, Batteries, Batteries, Solar Panels, Cable Connections, Lighting

FLIGHT ENGINES

Shell, Control, Fuel-system, Fuel Nozzle

Approved test bench of main and auxiliary engines are also stocked, including auxiliary fittings, instruments, remote controls and cables, with inlet and high pump spares.

By Boat Working Engineers are tested the operating systems that produce an over 2000 hours performance. Boat Working can also test the operating systems for the engine installation in a power plant. Efficiency of the engine is measured and performance will be regarded to those of a new one.

STUART

As Distributors for the above marine engine manufacturers we hold an extensive range of spares in our Stores for both current and early models enabling the experienced 'do-it-yourself' yachtsman to obtain an 'off the shelf' part to complete his engine repair with the minimum of delay.

Our service department is fully equipped to undertake all specialised work on these engines from a modest repair to a complete re-build and test to the same high standards as the manufacturer.

A large range of spares are also stocked for our Agency INBOARD and OUTBOARD Engines, including some obsolete models.

SALES OF NEW ENGINES — and Part exchanges are welcome. Current models are on show in our showrooms where our staff will be happy to assist in any way they can.

The spare counter and engine showrooms open Monday to Friday 9.30 - 5.30
SATURDAYS 9.30 - 5.00 (except 1 - 2 p.m.) Our service is backed by a modern order processing system. Telephone and mail orders are dealt with promptly and efficiently. Payment can be made by either Access or MasterCard. The maintenance of stock levels of some 30,000 spares is fully computerised.

HELPING — TO HELP YOU — Always remember to quote your quote card No. 890000.
SPARE LISTS ARE AVAILABLE UPON REQUEST.
