NEW! Coaxial Reduction PC Series Marine Transmission

Continuing in its tradition of designing quality marine transmissions to meet your requirements, Paragon Power introduces their new coaxial reduction transmission, the PC Series.

Engineered with smooth-running helical gearing and lightweight aluminum alloy reduction housing, the PC Series transmission becomes the newest member of our [Ultra Marine](#) family.

Engineered to Last!

Paragon Power marine transmissions are engineered to last. Long-life bearings, top-mounted controls, adjustment-free forward, positive lubrication and a free-showering design make Paragon an extremely efficient transmission. The PC Series and slip center versions of the PM, PMB and PL Series allow protruding of the reduction portion either up or down for greater flexibility (see figures 1 and 2). Designed for durability has enabled many Paragon transmissions to outlast the engine.

Reliability!

That's what you demand. That's what Paragon Power delivers. Direct drive, coaxial reduction, slip center or V-drive, rated to 200 hp and positive to 300 hp. [Paragon Performance!](#)

PC Series

		SLIP CENTER	UP	DOWN
PMB	PM	200/200	200/200	200/200
PC200	PC200	10:1	20	20
PC300	PC300	10:1	20	20
PC400	PC400	10:1	20	20
PC500	PC500	10:1	20	20
PC600	PC600	10:1	20	20
PC800	PC800	10:1	20	20

HP=Horsepower, RPM=Revolutions Per Minute. *Based upon manufacturer's rated output.
