

THE GEAR SPECIALIST

THE COMPANY

Vita Mekonika Herkrod was established in 1971 as a marine engineering workshop and manufacturer of semi-direct engines with controllable-pitch propellers.

The popularity of medium-speed diesel from the late 1950's led to an increasing demand for suitable reduction gears, and engine production was phased out.

In 1987 the company produced the first of a series of reduction gears with integral hydraulic sense system for operation of a controllable-pitch propeller.

Manufacture and development of specialised reduction-gears for controllable-pitch propellers has been our primary business since 1988.

VITA,OH is a private company owned by staff members and local business interests.

THE PHILOSOPHY

To produce marine equipment of only the very highest quality, that will repay the initial investment with reliable long-term service.

THE PRODUCT

A series of reduction-gears in several configurations, built up from a core group of standard components, designed to meet the individual demands of our customers.

Taylor-made gears for a fast, flexible solution to power transmission needs.

Rugged and dependable equipment designed to partner controllable-pitch propellers from the major manufacturers.

THE RANGE

VERTICAL OFFSET

500 000 - 100 000

500 000 - 1000 000

HORIZONTAL OFFSET

500 000 - 100 000

500 000 - 1000 000

CO-AXIAL

500 000 - 100 000

500 000 - 1000 000

TWIN IN/SINGLE OUT

500 000 - 100 000

500 000 - 1000 000

SINGLE PTO/PTI

1 000 000

100 000 - 500 000

MULTIPLE PTO

1 000 000

100 000 - 500 000
